

Floor Sealer

MINNCOR Floor Sealer is a resilient and hard floor undercoater and conditioner that seals, conditions and acts as a bonding agent.

Penetrating deep into the pores of the flooring, the sealer creates an ideal surface for MINNCOR Floor Finish.

MINNCOR Floor Sealer dries in as little as ten minutes.

MINNCOR Floor Sealer is ready-to-use in 2.5- gallon, five-gallon and fifty-five-gallon units.

First, strip floor with MINNCOR Floor Stripper. Neutralize with MINNCOR Floor Neutralizer and clear water rinse. Check pH of floor to ensure that it is neutral.

For porous resilient floors, apply two or more coats of MINNCOR Floor Sealer. For non-porous hard floors, apply one or more coats.

Drying time can be reduced by use of fans. Wait a minute or two for proper leveling prior to using air mover. Do not aim air flow directly at the floor.

REPELS SOILS

- ✓ **Prevents soils from penetrating the substrate**
- ✓ **Extends life of substrate, saves money**

REMAINS PLIABLE

- ✓ **Beneficial for floors with heavy traffic, or that are very porous or over-stripped**

GREAT FOR WEARCOAT USE

- ✓ **To protect substrates without finish**
