

Floor Stripper

MINNCOR Floor Stripper is a resilient and hard floor finish/wax stripper. It uses a unique selective implosion technology, imploding polymer locks bonds at the molecular level so they can no longer bond. This stripper provides more complete floor finish removal and requires less scrubbing.

It is effective in hot, warm, or cold, and hard or soft water. Use for conventional, skim or mop stripping. Use on all floors including rubber and linoleum. Will not soften or bleach out synthetic flooring when used as directed for these types of flooring. It is also a superior baseboard stripper.

POLYMER LOCKS ARE QUICKLY IMPLoded

- ✓ Strips better, faster, easier
- ✓ Slipperiness is greatly reduced, cutting down on slips and fall accidents

USES A LUBRICATING MICRO-FOAM CATALYST

- ✓ Protects floors from harsh pads or brushes

DOES NOT OPEN PORES IN THE SUBSTRATE

- ✓ Provides a smoother application of sealer or finish
- ✓ Uses less product

LOW pH AFTER STRIPPING

- ✓ Attacks only the finish, not floor composition, preventing degradation of flooring

NO HARSH CAUSTICS, AMMONIA OR SOLVENTS

- ✓ Safer for people, property and the environment
- ✓ Minimal irritating odor that quickly dissipates

EFFECTIVE REMOVAL IN PROBLEM AREAS

- ✓ Removes rust, anti-oxidants, asphalt coal tar, and discoloration from rubber-backed mats

Concentrated MINNCOR Floor Stripper is available in one-gallon, five-gallon and fifty-five-gallon units.

Apply diluted stripping solution to floor. Let sit a minute or two. Scrub with an aggressive pad. Pick up slurry with wet vac. Neutralize, clear water rinse, check pH of floor, and, when neutral, apply MINNCOR Floor Sealer and/or MINNCOR Floor Finish.

Recommended dilutions are:

Regular stripping 1:8 (16 oz./gallon)

Heavy stripping 1:3 (32 oz./gallon)

Pretest to determine optimal dilution.
